# Press Release

## Geerpres® Introduces the UVairo UV-C Air Sanitizer

**Muskegon, MI, January 7, 2021:** Geerpres® remains committed to innovation and has developed products to address new cleaning protocols in this age of COVID. COVID-19 continues to require additional efforts to achieve a new level of clean. Today, air sanitization has also become paramount due to the spread of airborne viruses and pathogens.

The Geerpres® UVairo UV-C Air Sanitizer provides an active layer of protection and confidence against airborne viruses to ensure people are safe indoors and in shared spaces such as a doctor's office, daycare facility, restaurant, or manufacturing facility.

Through test results by Microchem Laboratory, the UVairo units successfully reduced virus particulates in the air by **96.7% within five minutes and by 99.93% in just 30 minutes**. After 60 minutes, 99.9993% of all airborne pathogens and viruses would be eliminated. **No other company in the United States is shows these success rates in such a short amount of time!**

Available in three unit sizes, the UVairo 500, 600 or 1600 are designed for various size rooms from 12' x 12' up to 31' x 31' areas. The UVairo units draw in air, filter and pass the air through a high-intensity UV-C light chamber removing harmful particulates, viruses and bacteria.

All systems are put through a rigorous testing protocol to ensure optimal performance. This ultraviolet light sanitization technology has been used for over 15 years in various industries, with high-proven results.

### About Geerpres®

Geerpres® has been a leader in the Jan-San industry for over 85 years. Stainless steel wringers, seamless buckets, and EVS carts have been the industry standard in healthcare facilities, including hospitals, clean room, food service, education markets, and more. Today, Geerpres® has expanded to include patented, self-dispensing microfiber applicators, disposable mops, and wipes that virtually eliminate cross-contamination concerns and increased productivity.
